pool owners™

## This is one bug you'll want in your pool

Had enough with manual pool cleaning maintenance? Want to start enjoying your pool more? Then throw a bug in your pool. That's right. AquaBug –the most intelligent above-ground-pool cleaner you can buy. And it's only from Hayward.

Exclusive SmartDrive® programmed steering system.

Using our patented SmartDrive programmed steering system, AquaBug won't miss a spot – gobbling up everything from microscopic dust to larger debris. And it does so automatically, giving you and your family more time to enjoy your pool.

## Automatic Pool Cleaner for Above-Ground Pools

You'll never be bugged by manual pool cleaning again.

The AquaBug provides you with easy, trouble-free operation. You never need to empty or replace debris bags. And because AquaBug works with your existing filtration system, no extra energy-consuming booster pump is required. Everything for simple, 10-minute-or-less installation is included – even the hoses.

This bug loves to circulate.

Plus, AquaBug improves water circulation by acting as a moving main drain, pulling water from the bottom of your pool as it moves. Your water circulates and your pool stays cleaner – without the overuse of chemical sanitizers.

This bug hangs out with a smart crowd. As part of a complete family of superior quality products designed to keep your pool at its sparkling best, AquaBug is the smart alternative to the drudgery of manual cleaning. And it's from Hayward, the company that engineered automatic pool cleaning technology.

Dirt can't hide from this guy.

AquaBug utilizes patented SmartDrive® programmed steering to clean faster and more thoroughly than random cleaners. After you see how effortlessly AquaBug keeps your pool clean, you'll never see a need to manually clean your pool again.
