

WATER CHEMISTRY 101

(It's as easy as 1+2+2=Family Fun)

1 { Balancing of pool water– Leave this to a pool professional
(Have tested a minimum of 3 times per season)

+

2 { Sanitization– Maintain 1-2 ppm of chlorine (test bi-weekly)
pH Adjustments– Maintain a pH of 7.4-7.6 (test bi-weekly)

+

2 { Shocking– Add 1 lb per 10,000 gal. (dose weekly)
Algae Prevention– Add 3 oz per 10,000 gal. (dose weekly)
(dosage based on poly 60)

= **FAMILY FUN!!!**

Other things to remember:

- ✓ Run filter system a minimum of 12 hours per day (24/7 is optimal)
- ✓ Backwash filter, keep baskets clean of debris, & vacuum as needed
- ✓ Have fun!

Recommendations are based on professional grade products.
