

Intelligent products
for smart
pool owners™

The Big Fish In Pool Cleaners.

Had enough with manual pool cleaning maintenance? Want to start enjoying your pool more? Then throw a whale in your pool. That's right. Wanda the Whale® – the most intelligent above-ground-pool cleaner you can buy. And it's only from Hayward.

Exclusive SmartDrive® programmed steering system.

Using our patented SmartDrive programmed steering system, Wanda the Whale won't miss a spot – gobbling up everything from microscopic dust to larger debris. And it does so automatically, giving you and your family more time to enjoy your pool.

Automatic Pool Cleaner for Above-Ground Pools

No manual pool cleaning makes
a whale of a difference.

Wanda the Whale® provides you with easy,
trouble-free operation. You never need to
empty or replace debris bags. And because
Wanda the Whale works with
your existing filtration system, no
extra energy-consuming booster
pump is required. Everything
is so simple, 10-minute-or-less
installation is included –
even the hoses.

This whale knows how to use its spout.
Plus, Wanda the Whale improves water
circulation by acting as a moving main drain,
pulling water from the bottom of your pool
as it moves. Your water circulates and your
pool stays cleaner – without the overuse of
chemical sanitizers.

This whale swims with a smart crowd.
As part of a complete family of superior quality
products designed to keep your pool at its
sparkling best, Wanda the Whale® is the
smart alternative to the drudgery of manual
cleaning. And it's from Hayward, the company
that engineered automatic pool cleaning
technology.

Wanda the Whale covers a lot of
ground automatically.

Wanda the Whale utilizes patented
SmartDrive® programmed steering to clean
faster and more thoroughly than random
cleaners. After you see how effortlessly
Wanda the Whale keeps your pool clean,
you'll never see a need to manually clean
your pool again.
